

Load Test Report

Blaz_Rec2025

Report Created By: SABBIR AHAMED
Date of Run: Mon, 05/12/2025 - 15:51
Duration: 9 minutes

Descriptive Summary / Conclusions

Save

The BlazeMeter Demo Site handled medium traffic (up to 50+ virtual users) efficiently. The average performance was solid, and the error rate was negligible. This suggests the system is suitable for small to medium-scale load testing.

Filters Applied

Engine Health

Load Engines: **Blaz_Rec2025 (r-v4-6821c404b3aaf694578451) at West India (Mumbai, Azure)**

Errors

There were no errors during the test.

Glossary

Throughput	Number of requests completed in a time interval.
Response Time	The time that passed to perform the request and receive full response.
Latency	The time from sending the request, processing it on the server side, to the time the client received the first byte.

About BlazeMeter

BlazeMeter offers a cross-enterprise test automation framework for the entire technical team throughout the product development lifecycle. Developers, DevOps, Ops and QA Engineers can run Continuous or “On Demand” testing for APIs, mobile apps and websites.
